Allowable Subject Matter

Claims 65-83 are allowed.

The following is an examiner's statement of reasons for allowance: Mesecher et al (US 6,289,004) discloses a system for suppressing interferences signals. A first receiver receives a signal comprising a noise signal and a second receiver receives a desired signal and the noise signal. The noise signal is subtracted from the noise and desired signal to generate the desired signal substantially free of the noise signal. Mesecher does not disclose the receivers are located a certain distance from the interfering devices as stated in claims 65-83. Clough et al (US 4,672,674) discloses a method of canceling interference from a desired signal. The desired signal is a voice signal. Clough does not disclose the method and system for measuring RF emissions as stated in claims 65-83.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
